

## EZ-CARE<sup>2</sup>

### Child Care Food Program

#### Overview

For centers that participate in the government-subsidized Child Care Food Program (CCFP), the CCFP module automatically tracks eligibility and meals served. It interfaces to Excel spreadsheets to provide both detailed and summary reports that you can provide to the government.

#### Benefits

- Save hours of manual calculation
- Easily create reports for government subsidies
- Increase accuracy when using recorded attendance from the Time Clock module
- Generate additional revenue by participating in the CCFP

#### Features

- Meal counts based on attendance
- Detailed and summary reports
- Convenient Excel spreadsheet format
- Easy data updates and export

## EZ-CARE<sup>2</sup>

### Child Care Food Program

#### Commonly Asked Questions

##### How does the system work?

In your EZ-CARE2 system, simply select the child's eligibility level (Free, Reduced, or Paid). The attendance information is then exported into Excel, based on location (if your center has multiple locations), class and meal times. You will receive one report per class that will provide detailed information for each student, as well as a complete summary for the entire school or location.

##### Do I have to enter child attendance?

No! The system does the work for you! There are actually two ways that the CCFP program can work. If you use the TimeClock module to track attendance, the system transfers the attendance information to the CCFP module automatically, based on the time of attendance.

If your center does not use the TimeClock, the system uses the children's actual or contracted times to calculate meals

served. In states where you must track that the child was both present and obtained food, simply print the report so that staff can note exceptions, which can then be easily adjusted on your attendance spreadsheet.

##### Will it print information onto my state forms?

Each state has different reporting formats and most are not designed to accommodate computerized production. Most states are happy to accept our computer generated attendance records in lieu of their normal forms. For those states where this is not acceptable, it is still much easier to fill out forms using the information from the system's reports.

##### How much does it cost?

\$295 (also requires Excel™)
